

Amendments to the Claims:

1-17. (Canceled)

18. (Currently Amended) A solid support comprising a support surface with an array of functionalized sites wherein a solution in the amount of about 50 picoliter to 2 microliter at a functionalized site is separated from solutions at other functionalized sites by surface tension, and wherein the support surface of the functionalized site has a higher surface tension relative to the support surface surrounding the functionalized site.

19. (Previously Presented) The solid support of claim 18 wherein said support surface has $10\text{-}10^4$ functionalized sites per cm^2 .

20. (Previously Presented) The solid support of claim 18 wherein said functionalized site is about 50-2000 microns in diameter.

21. (Previously Presented) The solid support of claim 18 wherein said support surface is glass.

22. (Previously Presented) The solid support of claim 18 wherein said support surface is selected from the group consisting of nylon, polyethylene, polypropylene, polystyrene and polytetrafluorethylene.

23. (Canceled)

24. (Previously Presented) The solid support of claim 18 wherein said functionalized site provides attachment to a nucleic acid.

25. (Previously Presented) The solid support of claim 18 wherein said functionalized site provides attachment to a peptide.

Application Serial No. 09/715,426
Amend. Dated August 20, 2004
Reply to Advisory Action of February 9, 2004

26. (Previously Presented) The solid support of claim 18, 24 or 25 wherein said functionalized site provides a covalent attachment.

27. (Previously Presented) The solid support of claim 18, 24 or 25 wherein said functionalized site provides a non-covalent attachment.
